About us

A Finnish forerunner in the ventilation industry

Airfi is a Raisio-based company that manufactures the most energy-efficient air handling units on the market. Together with our customers, our R&D team is constantly developing modern products that stand out. We listen carefully to the wishes of all our customers, and react accordingly as quickly as possible. We are constantly investing in the design, testing and development of our products, so you can always be confident in the quality of our products.

We have been awarded the Key Flag Symbol, which is a symbol of Finnish work. Our products have a high degree of domestic origin.

The Airfi team

We are passionate about our work and want to stay at the forefront of the industry also in future. Yet, there's a relaxed and innovative atmosphere at the office. It is important to us that everyone feels welcome and that every single one of our employees know and feel their worth. Every member of our team has an important role to play.

Developing new technology obviously requires strong product development skills, but in addition to development, products must also be carefully manufactured. Our professionals in sales and marketing know our customers, and they communicate our customers' needs to our product development team. At the heart of everything we do is customer satisfaction with our services and products – that is why our product range is built largely around our customers' wishes.

Innovative ventilation solutions.

Airfi App

The app allows you to control your air handling unit wirelessly via Wi-Fi

AIR HANDLING UNITS

Airfi air handling units enable fresh and healthy indoor air. The new Airfi air handling units are designed for the demanding conditions of the North. The Airfi range offers the right unit type for single-family homes, terraced houses, apartment buildings, public facilities and offices. Airfi units have enhanced dehumidification through the bottom of the unit to ensure efficient and energy-friendly operation during cold periods.

Airfi Model 60, Model 100 and Model 130 air handling units are only 558 mm wide and they can be installed inside a cabinet.

Humidity automation

The most intelligent demand-controlled humidity automation on the market as standard (models 60, 100, 130 and 150).

High living comfort

The energy-efficient and quiet unit is easy and effortless to use.

Quick installation

Quick and easy installation on a ceiling bracket.

Uniform temperature

Intelligent cascade-controlled bypass damper that takes temperature variations into account.

AFPS™ technology

The AFPS™ hoarfrost protection ensures continuous ventilation in your home.

Unit controls

The unit can be controlled with a control panel or the Airfi App.

Condensate removal

Thanks to the sloping inner bottom, condensation water is efficiently removed.

Building automation control systems

Connectivity to common home automation systems as standard.

Quiet ventilation

dB set

Sometimes it is the small details
that make the whole system work.

Our **dB set** has been developed according to customer requirements for applications where the noise level should be minimal. The noise levels of the dB set have been measured by an external accredited laboratory.

On our website, you will find a link to a calculation programme that makes it easy to see the effect of the dB set on the noise coming through the sheath. The calculation programme shows the dB value of a so-called "hard room" (e.g. a bathroom) and a normal habitable room.

Calculation programme

**Direct link to the
calculation programme!**

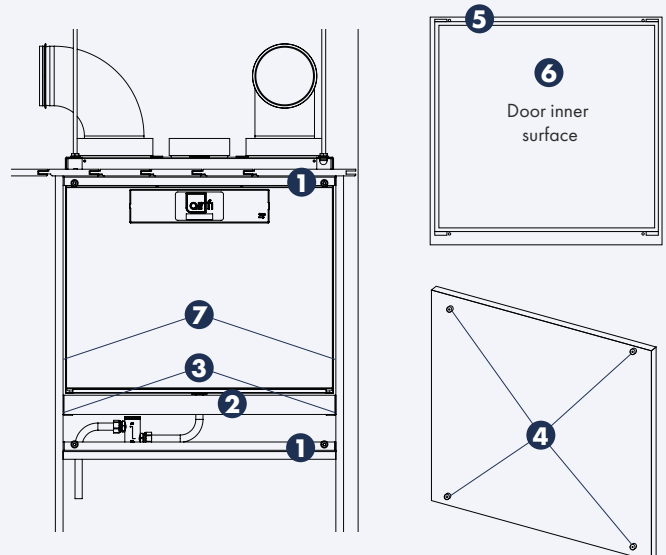

Or find the calculation
programme on our website at
www.airfi.fi.

Components

1. Front strip (2 pcs)
2. Insulating plate, 40 mm
3. Insulating plate retaining strip (2 pcs)
4. Connector bolt M6 (4 pcs)
5. Door sealing tape
6. Door mass-type plate
7. Resonance insulation (2 pcs)

NB:

The basic dB set does not include the cabinet frame and door.

Calculation programme

The Airfi calculation programme calculates accurate octave-band sound power levels of the air flow in the duct system and the environment. The programme also calculates the control percentages for both fans and the SFP value according to the given air flow and duct pressure drop. The programme also shows the unit's annual efficiency. This document can also be used as an appendix to an application for a building licence.

Direct link to the calculation programme!

Or find the calculation programme on our website at www.airfi.fi.

Airfi Frost Pro System

Welcome to the A+ energy efficiency generation.

With the AFPS technology, the annual efficiency rating of Airfi Oy's air handling units is A+.

Airfi Frost Pro System (AFPS) is standard in all air handling units manufactured by Airfi Oy. The new Airfi Frost Pro System (AFPS) is a self-learning hoarfrost protection system which guarantees excellent performance during cold periods.

Airfi Frost Pro System is a Finnish invention, where the heat exchanger is defrosted only when there is a need for it. This way the air handling unit works in prolonged freezing weather.

The energy used to defrost the heat exchanger is taken from the extract air. This way, the energy provided by the heating resistors is used in the apartment rather than, for example, heating the exhaust air with the front resistors.

The defrosting function is used optimally, saving energy compared to older solutions. The self-learning capabilities make it possible to take the individual characteristics of the air handling unit into account, for example, how dirty the filters and heat recovery cell are. By choosing an energy-efficient air handling unit from Airfi Oy, you will save significant amounts of energy.

Control hoods

EXHAUST HOODS

Control hoods

Airfi's control hoods are designed to control not only the smoke removal system, but also the individual air handling unit or the roof ventilator.

Washable grease filter
Metallic machine-washable grease filter.

Fixed structure
Durable product with a metal structure.

LED lights
Ecological and long-lasting LED lights.

Quick to install
Easy and quick to install.

Ventilation
Control hoods are suitable for controlling your home's air handling system or roof ventilator.

Plug connection
A safe and fast connector for all hoods.

Safera safety technology
Some products are compatible with Safera safety technology.

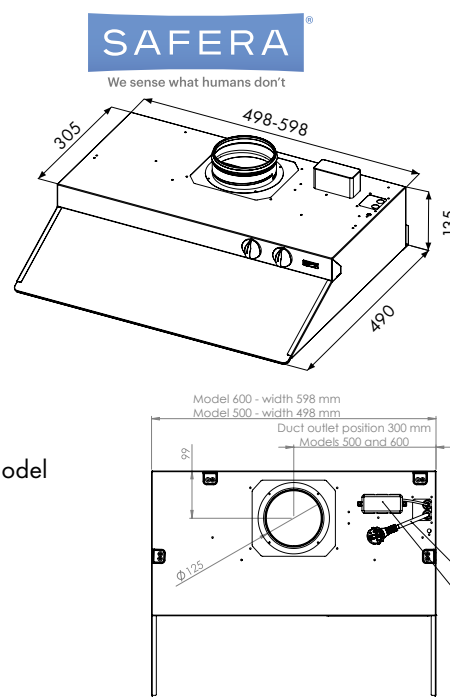

Pia-SA57w-AC-EC

Pia-SA67w-AC-EC

A classic cabinet-mounted control hood that can be quickly installed in cabinets of different depths.

Technical specifications

- » LED lights, 2 x 3 W 4000 K
- » Width 500 (SA57w-AC-EC) and 600 mm (SA67w-AC-EC)
- » Booster valve with timer (60min)
- » Speed control 1–5
- » Control methods: AC and EC control
- » With forced connection (continuous control voltage or e.g. a model that stops the roof ventilator [factory setting])

Model	Code	HVAC number	Width	Colour	Power
Pia-SA57w-AC-EC	20 000 056	7916095	500	White	230V 10A 50Hz plug max. load 360W
Pia-SA67w-AC-EC	20 000 057	7916096	600	White	230V 10A 50Hz plug max. load 360W

Accessory

Safera Siro or integrated Sense unit, depending on the hood type

Code

40 000 054

Stove power control unit Safera PCU6.3, 3x16A 400 V

40 000 056

Safera leak guard

40 000 057

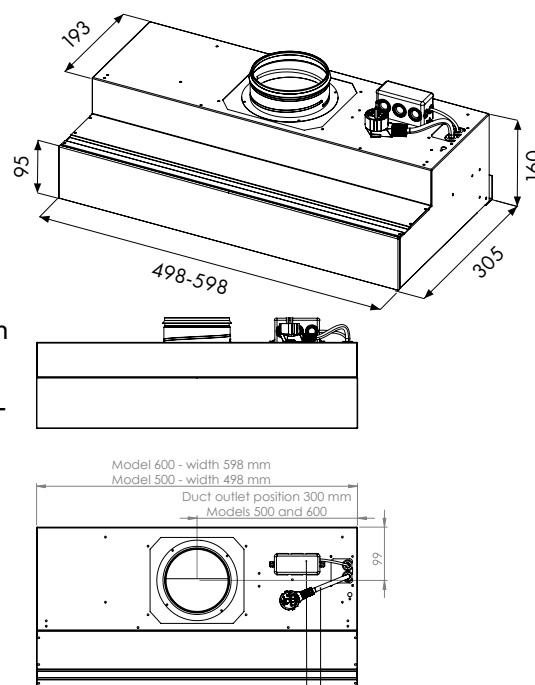

See p. 24 for the hood installed and pulled out.

Suvi control hood

Pull-out control hood integrated in a cabinet. Airfi's control hoods are designed to control not only the smoke removal system, but also the individual air handling unit or roof ventilator.

Technical specifications

- » LED lights, 2 x 4000 K
- » Width 500 and 600 mm
- » Pull-out, with plug
- » Booster valve with electronic timer (60min)
- » Touch keypad integrated in the glass
- » Boosted ventilation and vacuum compensation during cooking (*Settings are adjusted during commissioning. This function can also be overridden.*)
- » Back cover strip included in the delivery
- » Duct connection 1 x 125 mm
- » Machine-washable metal grease filter
- » Accessories: AC control unit, electronic hoods (Airfi product code 40 000 063)

White edition

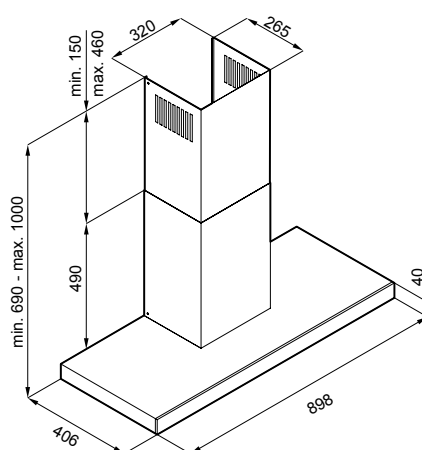

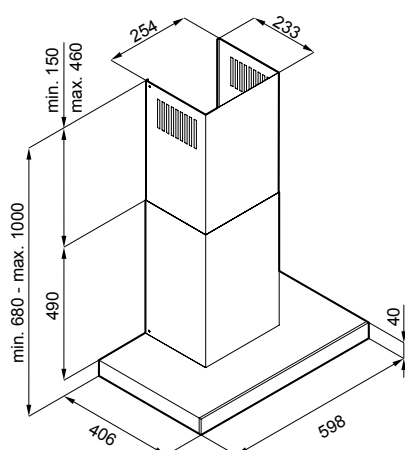

NEW

Ida control hood

A wall-mounted model with optional placement. The hood has capacitive switches integrated in the front panel. For controlling an Airfi air handling unit and an EC roof ventilator.

Details

- » 2 x LED lights, 4000 K
- » Width 600 and 900 mm
- » Booster valve with electronic timer (60 min)
- » Duct connector size 1 x 125 mm
- » Duct cover included in delivery
- » Boosted ventilation and vacuum compensation during cooking (Settings are adjusted during commissioning. This function can also be overridden.)

Model	HVAC number	Width	Code	Colour
Ida-CC60w control hood	7916076	600	20000058	White

White edition

NEW

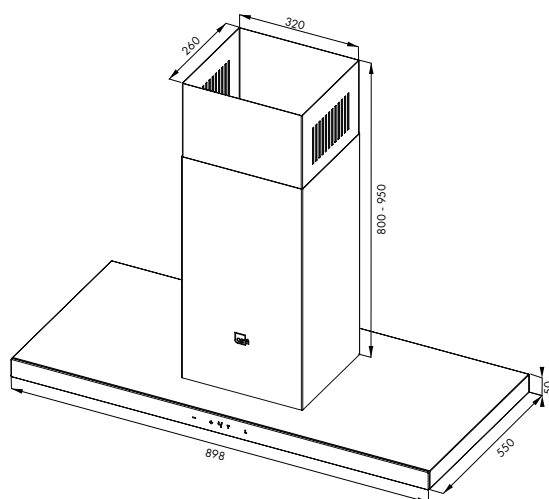

Eva control hood

Freely mounted island-type model with adjustable installation height. The hood has capacitive switches integrated in the front panel. For controlling an Airfi air handling unit and an EC roof ventilator.

Details

- » 4 x LED lights, 4000 K
- » Booster valve with electronic timer (60 min)
- » Duct connector size 1 x 125 mm
- » Duct cover included in delivery
- » Boosted ventilation and vacuum compensation during cooking (Settings are adjusted during commissioning. This function can also be overridden.)

Normal adjustment tolerance for mounting protection and duct cover 800–950 mm

Extra compact delivery available on request 650–800 mm (MENTION WHEN PLACING THE ORDER)

Model	Code	HVAC number	Width	Colour
Eva-CD90w control hood	20000060	7916078	900	White

Central hoods

EXHAUST HOODS

Central hoods

Airfi central hoods are designed for centralised air handling systems. The hood is designed to make installation and adjustment easy and effortless. Performance values are measured with a pressure gauge without separate measuring hooks. From the same point, the desired normal air flow rate and the desired enhanced air flow rate can be measured. The fire valve is removable behind the grease filter.

Airfi central hoods meet the airborne sound insulation requirements of the relevant building regulations. All the central hoods also comply with the measurement standard SFS-EN-ISO 10140-2 and ISO 717-1.

Washable grease filter
Metallic machine-washable grease filter.

Fixed structure
Durable product with a metal structure.

LED lights
Ecological and long-lasting LED lights.

Quick to install
Easy and quick installation.

Fire valve
Safe and type-approved

Soundproofed
Silent running sound.

Effective smoke removal
The hood allows for effective smoke removal.

Safera safety technology
Some products are compatible with Safera safety technology.

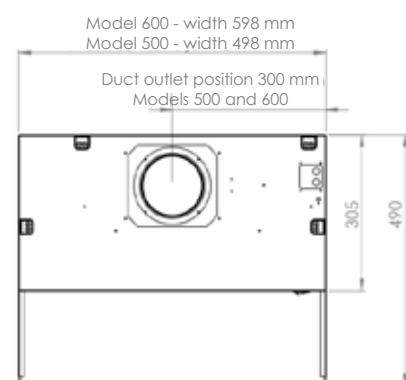

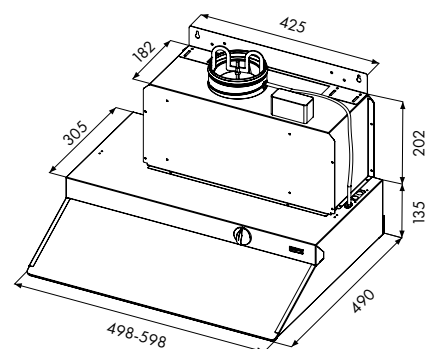

Pia central hood

A classic cabinet-mounted central hood for centralised air handling systems. Quick to install in cabinets of different depths. The fire valve is removable behind the grease filter.

Technical specifications

- » LED lights, 2 x 3 W 4000 K
- » Width 500 and 600 mm
- » Type-approved fire valve
- » Fixed structure, with plug
- » Booster valve with mechanical timer (60 min)
- » Signal of flap position:
 1. Voltage-free status signal (standard)
 2. Compensating damper 24VDC control (max. 7 W) (accessory 40 000 062)
 3. Compensating damper 230VAC control (standard)

NB: Choose the right connection cable between the compensating device and the hood.
- » Back cover strip included in the delivery
- » Duct connection 1 x 125 mm
- » Machine-washable metal grease filter
- » Available with Safera safety technology

Model	Code	HVAC number	Width	Colour
Pia-SA55w	20000015	7916011	500	White
Pia-SA65w	20000016	7916012	600	White

Accessory	Code
Transformer 230 VAC–24 VDC for compensating damper control	40000062
Safera Siro or integrated Sense unit, depending on the hood type	40000054
Stove power control unit Safera PCU6.3, 3x16A 400 V	40000056
Safera leak guard	40000057

See p. 24 for the hood installed and pulled out.

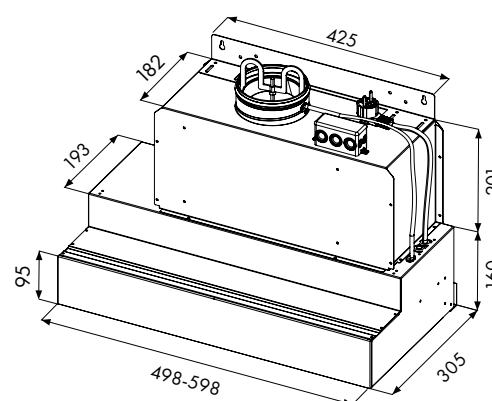

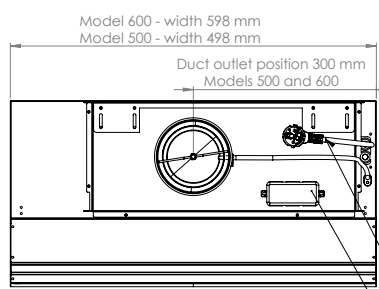

Suvi central hood

Pull-out central hood integrated in a cabinet. Airfi central hoods are designed for centralised air handling systems. Quick to install in cabinets of different depths. The fire valve is removable behind the grease filter.

Technical specifications

- » LED lights, 2 x 4000 K
- » Width 500 and 600 mm
- » Type-approved fire valve
- » Pull-out, with plug
- » Booster valve with timer
- » Signal of flap position:
 1. Voltage-free status signal (standard)
 2. Compensating damper 24VDC control max. 7 W (standard)

NB: When connected, a short-circuit element is used to select whether to use voltage-free or 24VDC compensation data.
- » Touch keypad integrated in the glass
- » Back cover strip included in the delivery
- » Duct connection 1 x 125 mm
- » Machine-washable metal grease filter

Ida central hood

A wall-mounted model with optional placement. The hood has capacitive switches integrated in the front panel. Airfi central hoods are designed for centralised air handling systems.

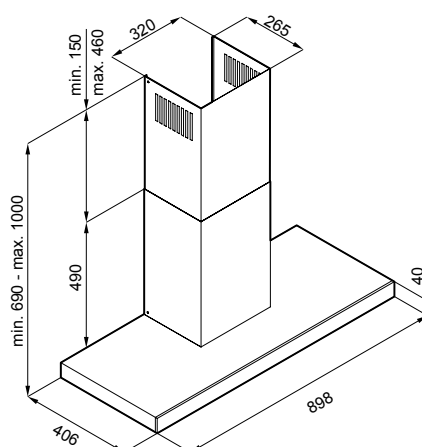

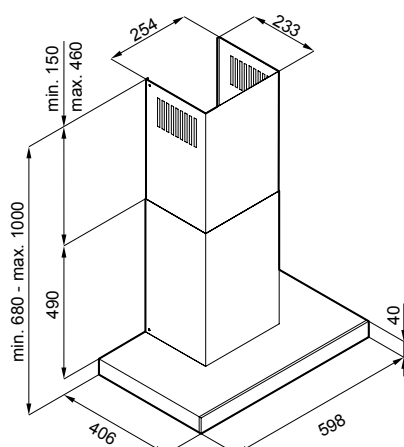

Technical specifications

- » LED lights, 2 x 4000 K
- » Width 600 and 900 mm
- » Booster valve with timer
- » Duct connector size 1 x 125 mm
- » Type-approved fire valve
- » Machine-washable metal grease filter
- » Signal of flap position:

1. Voltage-free status signal (standard)

2. Compensating damper 24VDC control max. 7 W (standard)

NB: When connected, a short-circuit element is used to select whether to use voltage-free or 24VDC compensation data.

Model	HVAC number	Width	Code	Colour
East CC65w	7916079	600	20000061	White
East CC95w	7916080	900	20000062	White

Eva central hood

Freely mounted island-type model. The hood has capacitive switches integrated in the front panel. Airfi central hoods are designed for centralised air handling systems.

Technical specifications

- » LED lights, 4 x 4000 K
 - » Duct connector size 1 x 125 mm
 - » Booster valve with timer
 - » Type-approved fire valve
 - » Machine-washable metal grease filter
 - » Signal of flap position:
 1. Voltage-free status signal (standard)
 2. Compensating damper 24VDC control max. 7 W (standard)
- NB: When connected, a short-circuit element is used to select whether to use voltage-free or 24VDC compensation data.

Normal adjustment tolerance for mounting protection and duct cover 800–950 mm

Extra compact delivery available on request
650–800 mm (MENTION WHEN PLACING THE ORDER)

Model	Code	HVAC number	Width	Colour

Cooker hoods

EXHAUST HOODS

Cooker hoods

Airfi's portfolio also includes cooker hoods. Cooker hoods always have an integrated fan. An optional charcoal filter is also available for Airfi cooker hoods if the exhaust of extract air is not possible.

Washable grease filter
Metallic machine-washable grease filter.

Fixed structure
Durable product with a metal structure.

LED lights
Ecological and long-lasting LED lights.

Quick to install
Easy and quick to install.

A simple solution
Better air quality in an old kitchen with a charcoal filter

Plug connection
A safe and fast connector for all hoods.

Charcoal filter
Optional charcoal filters are available for cooker hoods

Easy to use
Simple control panel

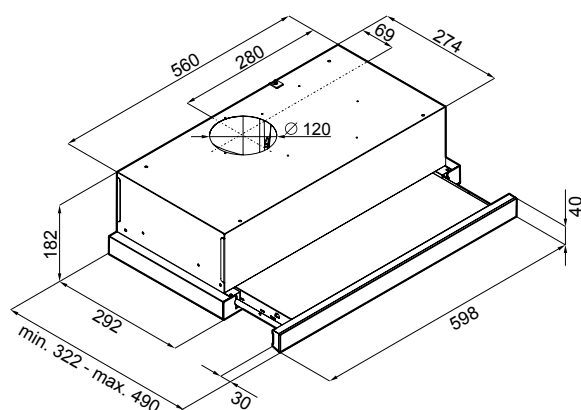

Ava cooker hood

Pull-out cooker hood integrated in a cabinet. The cooker hood has capacitive switches integrated in the front panel. A model with its own fan and cable coupling.

Details

- » 2 x LED lights, 3400 K
- » Duct connector size 1 x 120 mm
- » Minimum/maximum suction power 275/500 (m³/h)
- » Sound levels: min. 48 dB / max. 50 dB
- » 85 W motor
- » Energy class D
- » Available with a charcoal filter

Model	Code	HVAC number	Width	Colour
Ava-CB61w	20000007	7916004	600	White

Accessory			Code	HVAC number
Charcoal filter Ava-CB61s, Ava-CB61w			40000032	7916070

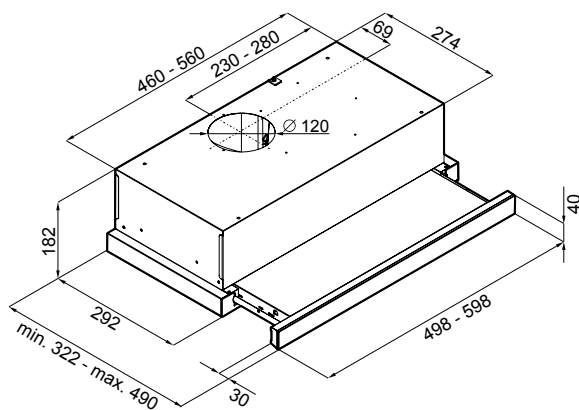

Rosa cooker hood

Pull-out cooker hood integrated in a cabinet. There is an electric switch on the hood body A model with its own fan and cable coupling.

Details

- » 2 x LED lights, 3400 K
- » Width 500 and 600 mm
- » Duct connector size 1 x 120 mm
- » Minimum/maximum suction power: 135–141/190–198 (m³/h)
- » Sound levels: min. 48 dB / max. 50 dB
- » 90 W motor
- » Energy class D
- » Available with a charcoal filter

Jade cooker hood

Ceiling-mounted island-type cooker hood. Controllable by remote control or from the screen with a capacitive controller. Machine-washable grease filters. Four different suction power levels.

Details

- » 4 x LED lights, 3400 K
- » Exhaust hood timer 10–90 min.
- » Duct connector size 1 x 150 mm
- » Minimum/maximum suction power 260/585 (m³/h)
- » Sound levels: min. 52 dB / max. 62 dB
- » 250 W motor
- » Energy class C
- » Remote controller included
- » Available with a charcoal filter
- » The fan unit can also be placed further into the duct system.

Accessory	Code	HVAC number
Charcoal filter Jade-EB01w	40000028	7916066

Accessories

Silencers

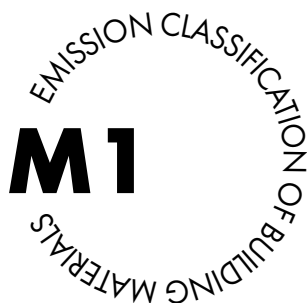

Effective noise reduction

Airfi silencers have been designed to meet the increasingly strict noise level standards. An air handling unit should always be fitted with effective silencers, so that the sound entering the apartment is effectively attenuated. Sound from the air handling unit can only be properly attenuated by silencers designed for residential buildings and correctly installed. The result is a quiet and compliant living environment.

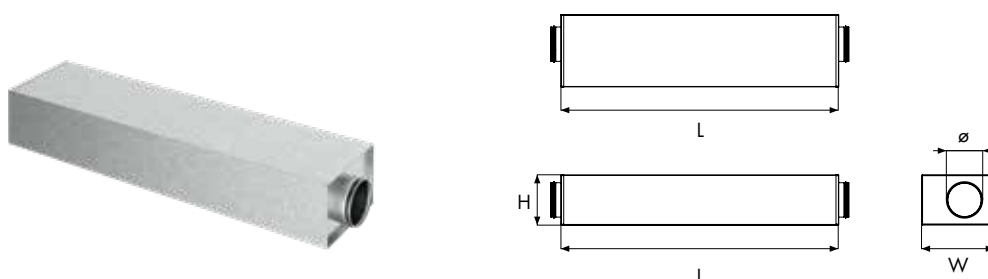

Clean and safe product

The silencers are designed with high-quality and clean materials to ensure good sound absorption. Silencers are available as straight and angular versions. Angular silencers provide better sound attenuation and allow the silencer to fit into a smaller space. We also supply special silencers for special applications.

The inner part of the Airfi silencers is fitted with a perforated plate, if necessary. Basic silencers are supplied without a plate.

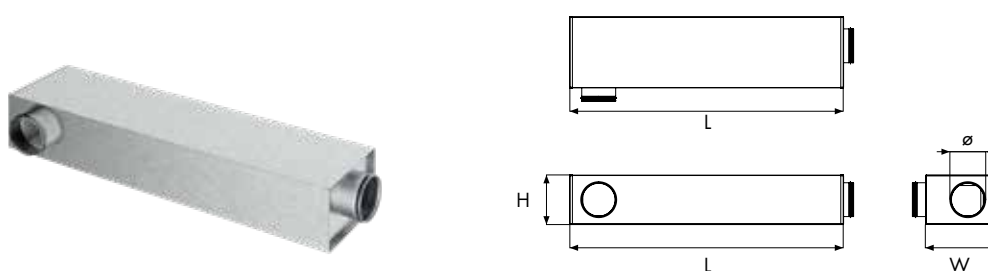

Technical specifications

Model	Code	LVI	Ø	L	W	H	Weight
Airfi - straight 125-1000	41125100	8329700	125	1005	260	180	7 kg

Santeri damper

The installed and adjusted compensating unit balances the vacuum during the boost of the general exhaust and the exhaust hood. Vacuum balancing is achieved by the compensating unit receiving a signal from the exhaust hood when the hood's boost damper is opened, thus increasing the corresponding amount of supply air flow to the apartment.

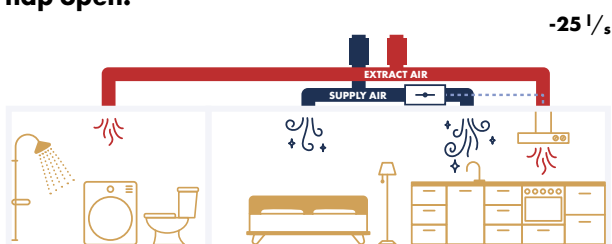

Example

The damper unit can be used to balance the ventilation. For example, in a block of flats, the negative pressure caused by an exhaust hood's booster function can be compensated by increasing the supply air flow rate.

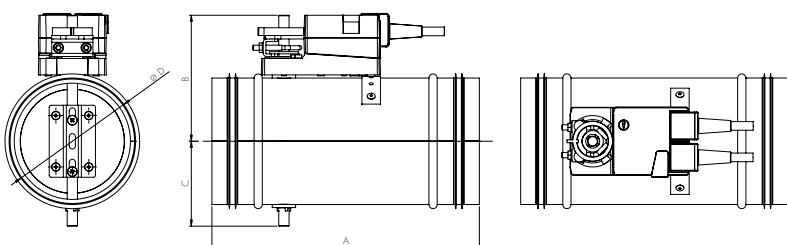

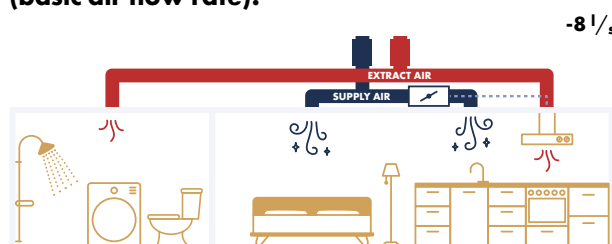

Exhaust hood flap closed:

Exhaust hood flap open:

Exhaust hood general exhaust (basic air flow rate):
